

A black metal chair with a white cushion and green ivy, set in a sun-dappled grassy field. The background is a lush green lawn with dappled sunlight and a blurred forest in the distance.

Viogene[®] Gel/PCR[™] DNA Isolation System

Tools for Genomics

Viogene® Gel/PCR™ DNA Isolation System

Viogene® Gel/PCR™ DNA Isolation System is developed to isolate DNA from agarose gel, PCR products, and other enzymatic reactions.

With just a few easy binding and washing steps, Viogene® Gel/PCR™ DNA Isolation System can amazingly recover ready-to-use DNA from various samples in about 10-20 minutes.

Advantages:

With just one kit, you can process up to 75% of DNA purification procedures in your lab !!

Suitable sample:

1. Agarose gel
2. PCR product
3. Enzymatic reaction

DNA isolation size:

100bp - 10kbp

Downstream application:

1. Sequencing
2. PCR
3. Ligation
4. Enzymatic reaction

Lane 1 : 400 bps PCR product
Lane 2 : Perform gel extraction to get rid of un-wanted DNA fragments via gel extraction

Lane 1 : 100% PCR product loading control
Lane 3 : 50% PCR product loading control
Lane 2 - 4 : The PCR product clean up with Gel/PCR™ DNA Isolation System (Recovery up to 90%)

Ordering Information

Product	Package	Contents	Cat. No
Viogene® Gel/PCR™ DNA Isolation System	50 preps	50 GP™ Columns, Buffers	GP1001
	250 preps	250 GP™ Columns, Buffers	GP1002
