SUNWAVE

SMR-140 Black

SMR-420

SMR-440

SKRM-1000(S)<OEM/ODM>

SKRM-1000, which is included Keyboard, remote control and mouse, 3 in 1 device. What you can see the keyboard input key is a LCD and touch screen or touch pad only to perform mouse function. When you press the "down button" that it'll be changed to "mouse" mode. You can use your finger or plastic pen to locate the cursor anywhere. If you press the "up button", it'll be changed to be a "remote" control. When you press up and down button at the same time, it'll come back to be a "keyboard" mode

Up Button

Down Button
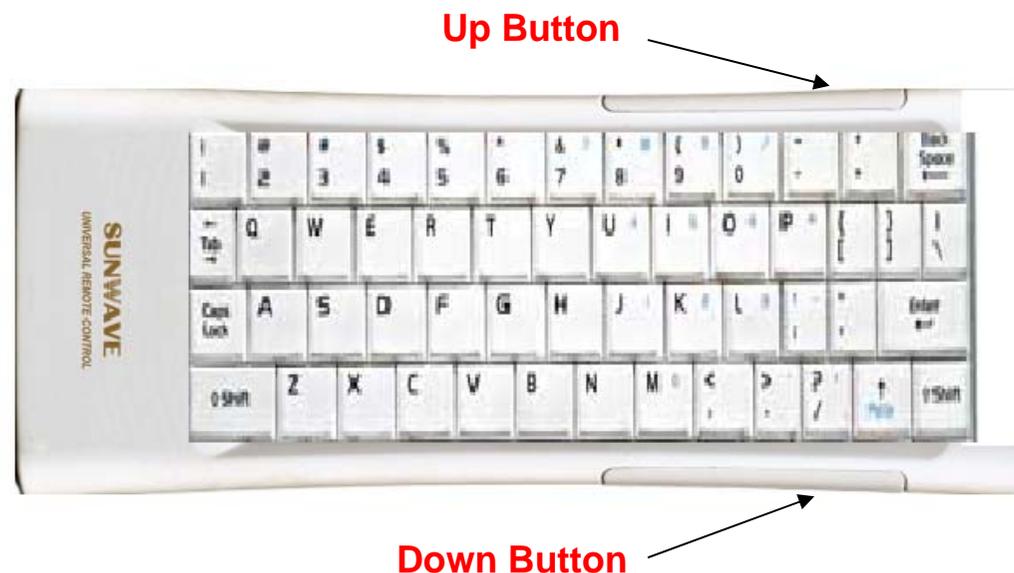

With G-sensor to change mode will be a good way as well

- As to the remote control, it's designed to be a universal remote control. If you need to keep space or correspond with the other devices (for example, DVD player, amplifier, …etc.). No need to use the other one remote control or traditional keyboard, mouse.

- Pre-code setting is by learning function or from PC website download automatically over USB connection which input pre-code directly to control the other devices/appliances. Certainly, it's suit for the IP-TV, STB, and so on... Above all, home(hotel) automation market.

SKRM-1000(P)／<OEM/ODM>

TV

Telephone

All the function (K/B,mouse,remote control) is same as SKRM-1000(S) on the other side (backside). But, we bundle the home cordless phone or mobile phone to make the dream of TRUE digital home automation come true. (4 in 1).

cell phone (access control)

Conclusion

- Therefore, what we mean is, you can use SKRM-1000(P) to control your home, even over internet , mobile phone or home cordless home to control all devices/appliance whatever you're at home or not.
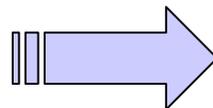

What can we provide ? Why Sunwave ?

● Our proposal is as below for option or re-assembly:

a) RF module (2.4G)／IR to RF module
