

# Customized Cold Forged & Turned Metal Parts

Shining Jins Enterprise is a professional manufacturer of forging and cold-forging metal parts to numerous markets products. The combination of cold forging and forming saves on some machining operations, leading to considerable cost reductions. We provide high quality and compatible products for different requests and wishes from clients. And not only offering good products but also offering turning precision machining metal part and special thread parts.

## Advantages of cold forged products :

- Material savings
- Eliminate and/or reduce additional machining operations
- Improved strength, mechanical properties, grain flow
- Improved surface finish vs machined products
- High-speed production
- Less scrap
