BMD INTRODUCTION

Besides IT services, we have also co-operated with other manufacturers in Taiwan to produce powerful new products through our own R&D development and design. The electronic door lockset is currently our main product in the market. KEETFREE is a professional E-lock brand in Taiwan. The founder, Mr. Fan, has devoted himself to the development of electronic lock for decades of years. He firmly believe that as a Taiwan manufacturer, we could offer not just good quality products but also the unique technique of lockset. Because of this conviction and Mr. Fan's passion on the products, he has successfully developed a safe multi-throw Electronic lockset. BMDTEC has obtained the

Established at Year 2010, BMD TEC is an innovative company which with professional R&D development, electronic technique and the Marketing abilities. These unique abilities equipped us with much competitive advantage in providing our customers with software application and system integration service. BMD TEC could present customers not just to offer "know how" of products in both technique and marketing fields, we also able to assist customers developing new products with much competitiveness according to their market requirement.

Besides, we have successfully provided some database enterprises with specialized computerization service. These computerized services including computer system
